

Thank you for purchasing
TREEDIAPER®

For best results, please follow
these procedures to install and use
your TreeDiaper® product!

TREEDIAPER®

Advanced Plant Hydration System

INSTRUCTIONS

For Container Plants

A) Using TreeDiaper® product on indoor plants

1. Place the TreeDiaper® product completely submerged in water in a sink or bucket for at least 5 hours or overnight.

2. Place the soaked TreeDiaper® product darker side up on top soil and around plant base in the container.

3. The plant will stay watered for 2-5 weeks. When there is less than 1/4 of the initial water, begin again at step 1.

B) Using TreeDiaper® product on outdoor plants

1. Place the TreeDiaper® product completely submerged in water in a sink or bucket for at least 5 hours or overnight.

2. Place the soaked TreeDiaper® product around plant base in the container with darker side facing up.

3. The TreeDiaper® product can be recharged by rain or irrigation, but should be checked weekly. When there is less than 1/4 of the initial water, water the plants normally as needed, or begin again at step 1.

NOTE:

- Always place the mat with the darker black woven side facing up!
- Covering with mulch, pine needles, or leaves is recommended.
- Do not place any soil, dirt, fine sand, compost, or iron-based sticks or tomato cage on top of TreeDiaper® products. This may result in the loss of functionalities of TreeDiaper® products.
- Direct contact of fertilizers with the material in use or in storage may temporarily or permanently affect the performance of the product.
- Do not poke TreeDiaper® products with sticks. Damage to the surface integrity of the TreeDiaper® products may decrease functionality of the product.

If you have any questions, please email info@treediaper.com.
